

Wet Earth Irrigation: High Volume Sprinkler Comparison Table

1. The display order is based on largest nozzle included in the specification tables although some sprinklers can fit a larger range of nozzles.
2. Radius, pressure and volume figures are as per specification tables. Sprinklers may be able to operate at higher pressures, and hence larger radius and volume.
3. Prices displayed are Australian List Prices (inc GST). Actual Wet Earth prices may be lower, and further discounts are available for orders of more than 5 sprinklers.
