

ZERO

WATERLESS DUST SUPPRESSANT FOR ALL TRAFFICKED GROUND

BENEFITS

- **ZERO** water required for application and ongoing watering programs
- **ZERO** harm for the environment
- **ZERO** effect on application equipment
- **ZERO** slipperiness and **ZERO** curing for immediate results
- **ZERO** odour
- Can be applied in sub- **ZERO** conditions
- Cumulative effect with ongoing maintenance applications with **ZERO** water
- Simple, clean and easily applied with **ZERO** water

DESCRIPTION

ZERO is the ultimate in long-term dust control where watering programs are not an option.

ZERO's environmentally friendly 'Synthetic Organic' formulation is the latest chemical innovation developed through RST's ongoing Research and Development programs. **ZERO's** crystal clear, free flowing, odorless chemistry has been formulated to meet the highest standards of environmental regulations globally.

ZERO's penetrating and aggregating properties allow the product to permeate into the individual fine particles weighing them down so they are unable to be blown away as dust.

ZERO's unique formula creates a long term, re-workable solution that doesn't evaporate or freeze.

APPLICATION

ZERO is sprayed directly onto the treatment area at the recommended dosage rate, which can vary depending upon traffic types and volumes, material type and the time required for the material to remain **Dust Free**. This can vary from 0.2 litres to 1.5 litres per m².

The longevity of **ZERO** can reach 18 months when heavier dosage rates are applied. Maintenance reapplications only require 30% of the original application dosage rate.

HEALTH, SAFETY, ENVIRONMENT AND THE COMMUNITY (HSEC)

RST strives, through a process of continuous improvement, to fully integrate health, safety, environmental and community (HSEC) consciousness into all aspects of its activities

Please refer to latest Product Technical Sheet or Material Safety Data Sheet for more information.
